

Ukrin, which was used for cancer treatment, was used in the treatment with the consent of the patients.

Esmâ Karuc, 54, was infected with the Corona virus. The patient had high fever, respiratory problems, loss of taste and smell. Ukrin treatment was initiated in him. Ukrin capsules were supplied by the patient's family in Germany. 2 capsules 10mml a day, after oral use, after 3 days in total the patient recovered and the corona test results were negative.

Nalan Gökce, a cancer patient with metastases in the brain, lungs and spine, used 50 ampoules of Ukrin and when the tumor builder was above 2.117 u / ml, it fell to 1.165 u / ml. Nalanin's husband was infected with Corona virus. Ukrin protected her. Her husband was treated with Ukrin for 3 days and he recovered without any side effects.

The worst Covid-19 case I have encountered was my 21-year-old son, Sabri Tanriverdi. He was infected with Covid-19 and was sent to his home after being diagnosed with pneumonia in the hospital.

Sabri was admitted to the hospital again after his breathing got worse and his lung x-ray was taken. His breathing worsened. Inhalation therapy with Ukrin was done and the lungs were free again after 3 days and its oxygen saturation was 90 mmHg. Ukrin treatment was decided to be applied to the patient and 2 ampoules were intravenously applied for 4 days. One week later the patient completely recovered.

What surprised me as a doctor was that Ukrinin gave results in a very short time and there were no side effects in the patients.

We have thousands of cases of Covid-19 patients in Turkey but no cure.
Ukrin would
